Yaroslav Vendysh

Junior Full Stack Developer

Phone: +380934397172

Email: yro.vendysh@gmail.com

Skype: yro.vendys-gmail.com

GitHub: github.com/JaroSlavDEV

LinkedIn: linkedin.com/in/yaroslav-vendysh

Summary of Qualifications

Two years of experience in the web development (basics, stack MERN)
Experience on the freelance
Experience on the commercial projects
Team working experience by Scrum methodology
Certificated in the field of Web UI by SoftServe
Ability to work hard, learn quick and take responsibility

Skills

Hard skills

SDLC

- ALM. Methodologies - Scrum
- Source Control - Git

Environment

- IDE/Editors – Sublime, VS Code
- Package management – Npm, Yarn, Gulp

Code quality

- Static code analysis - ESLint
- Automated testing – Chai, Mocha, Jest
- Dynamic stylesheet – Sass, Scss

Core programming

- Syntax – EcmaScript 5/6/7/8
- OOP – Basic concepts, Prototype chain
- Async – Callback, Promises
- Interfaces – REST, HTTP, WebSocket

Client

- Syntax – HTML 5, CSS 3
- Frameworks/Libraries – Material UI, React, Redux, Proptypes, Formik, Yup, Axios
- DB/Storage – JSON, WebStorage, IndexedDB

Server

- Platform – Node.js
- Frameworks/Libraries – Express, Socket.io, Mongoose, Nodemailer, Passport, Jwt, Bcrypt
- DB/Storage – SQL, MySQL, MongoDB

Experience / IT related educational practice		SoftServe ITA Student - WebUI/NodeJS	
		20.12.2019 - 20.03.2020	
Project Description:		Defibrillators map It is a volunteer health care project. We have developed a service that could help people to find the nearest place with a defibrillator. This service includes a map system with defibrillators and a management system of defibrillators. The map system allows you to find, filter, and find out more information about defibrillators on the map. The management system has two roles: admin and user (could be registered only by admin). Admin could create/modify/delete any defibrillator, user – create/modify/delete only own defibrillator. The frontend is based on React + Redux, backend – Node.js/express, database – MongoDB.	
Customer:		Ukrainian volunteer	
Involvement Duration:		4 months	
Project Role:		Junior Web UI Engineer	
Responsibilities:		Backend <ul style="list-style-type: none">▪ Creating MongoDB database;▪ Creating models for working with database;▪ Creating access control logic.<ul style="list-style-type: none">○ registration – route, validation, jwt and permissions middlewares, mailing email, tests○ authentication – route, mailing email, tests○ authorization – route, jwt middleware, websocket, tests○ resetting password – route, validation, jwt middleware, mailing email, tests○ working with defibrillators - jwt and permissions middlewares Frontend <ul style="list-style-type: none">▪ Creating component Modal Window;▪ Creating component Fields (based on Material UI and Formik);▪ Creating module Auth;<ul style="list-style-type: none">○ API – http requests and websocket○ Redux – actions and reducers○ React – components Sign in, Sign up, Reset password▪ Creating component Account.	
Project Team Size:		8 team members	
Tools & Technologies:		React, Redux, Material UI, Axios, Formik, Mapbox, Proptypes, Yup, Node.js, Bcrypt, Express, Jwt, MongoDB, Mongoose, Nodemailer, Passport, Socket.io, Git, Github, Jest	
Languages		English – intermediate (B1) Ukrainian - native Russian - fluent	
Education		Bachelor's degree	Master's degree
		Lviv Polytechnic National University	
		Institute of Computer Science and Information Technologies	
		2015-2019	2019-2020
Additional education		<ul style="list-style-type: none">▪ Course « Web layout maker: freelancer code » – WayUp – 2017▪ Course « English. Intermediate » – Green Forest – 2019▪ Course « English. Upper-Intermediate » – Green Forest – 2020▪ Course « WebUI/NodeJS » – SoftServe – 2020▪ Certificate « English evaluation. Intermediate » – SoftServe – 2020▪ Certificate « Web UI. Trainee » – SoftServe – 2020	
Hobbies		<ul style="list-style-type: none">▪ Football▪ Video games▪ Artificial intelligence	<ul style="list-style-type: none">▪ Mindfulness▪ Reading▪ Cyber security
